NORTH-HOLLAND

Author Index—Volume 65

Andronova, N.G., 167
Ayres, R.U., 81

Berthon, P., 265

Chapuy, P., 67
Clift, R., 281
Coates, J.F., 115

de Jouvenel, H., 37
De Vries, B., 167

Godet, M., 1, 3, 113
Grübler, A., 167
Guerin, T.F., 205

Jiang, K., 167

Lafourcade, B., 67

Malyshev, S., 167
Masini, E.B., 49
Masui, T., 167
Molitor, G.T.T., 239, 297
Morita, T., 167

Nakićenović, N., 149, 195
Norberg-Bohm, V., 125

Penner, J., 167
Pepper, W., 167
Pitt, L., 265

Raper, S.C.B., 195
Roubelat, F., 1, 99, 113
Rozanov, E.V., 167

Sankovski, A., 167
Schlesinger, M.E., 167
Smil, V., 251
Smith, S.J., 195

van der Heijden, K., 31
Vasquez, J.M., 49

Watson, R.T., 265
Wigley, T.M.L., 195
Wilson, I., 23
Wright, L., 281

Yang, F., 167

Zhang, Y., 167

Subject Index—Volume 65

Agriculture and the environment, futures planning in France, 67
Australia, sustainable land management practices, overcoming constraints, 205

Catastrophes, challenge for long-term forecasting, 81

Discontinuity scenarios, 81

Electric power, approaches for stimulating environmentally sound technological change, 125
Emissions scenarios for analyses of climate change, 149, 167, 195
Energy forecasting, perils of long-range, 251
Environmental management
  constraints to sustainable land management practices in Australia, 205
  life cycle approach, along the supply chain, 281

Technological Forecasting and Social Change 65, 311–312 (2000)

© 2000 Elsevier Science Inc.

655 Avenue of the Americas, New York, NY 10010 0040-1625/00/$–see front matter

Environmentally sound energy technologies, incentives for technological change, 125

Food safety and the environment, futures planning in France, 67

Genetics, dominant U.S. economic activity of future (Perspective), 297
Greenhouse gas emissions scenarios, 149, 167, 195

Incentives for environmentally sound energy technologies, 125
Information technologies, for expanding networks, 99
Innovation, constraints to sustainable land management practices in Australia, 205

Leisure Era activities (Perspective), 239
Life Sciences Era activities (Perspective), 297
Long-range energy forecasting, perils of, 251

Networking, scenario planning, 99
Networks, importance in technology transfer and adoption, 205

Postmodernism and the Web, 265
Power sector, history of environmentally sound technologies, 125

Scenario planning
  definition and origins, 3, 115
  discontinuity scenarios, 81
  emissions scenarios for analyses of climate change, 149, 167, 195
  examples in France, 3, 67, 99
  futures planning with competitive actors in the agricultural and agri-food stuff sector, 67
  human and social perspective, 49
  introduction to special issue on, 1
  methodology for scenario building, 3, 37, 49, 115
  moving from scenarios to strategy development to action, 23
  as networking process, 99
  scenario use for group and organization decision making, 31
  scenarios as tools for analyzing situations, 31
Sulfur dioxide emissions scenarios, 167
Supply chain, imbalance between environmental impact and economic value, 281
Sustainable land management practices in Australia, overcoming constraints, 205

Waste management, product take-back, European mobile telephone pilot programs, 281
Web, impact on society, 265
